

Welcome! Please fill out the first page at the start of the session.

As a cardiologist:

I have seen situations in which inaccurate interpretation of serum troponin has led to:

	Very Frequently	Frequently	Occasionally	Rarely	Never
Unnecessary additional testing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Unnecessary admission	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Prolonged length of stay	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Billing of unnecessary services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Misdiagnosis	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Disagreements about patient management	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Delay in additional patient care	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

I have seen situations in which serum troponin is ordered:

	Very Frequently	Frequently	Occasionally	Rarely	Never
In the absence of anginal symptoms	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When there is no cardiac presenting issue (e.g. hip fracture, infection)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
As part of a routine order set	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

My knowledge in providing recommendations for interpreting troponin in the following conditions is:

	Very Strong	Strong	Adequate	Inadequate	Very Inadequate
Troponin in acute coronary syndrome	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in impaired kidney function	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in sepsis	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in infection	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in physical trauma	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in atrial fibrillation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in heart failure exacerbation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in post-heart transplant	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in chemotherapy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in immunotherapy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in pregnancy (e.g. pre-eclampsia)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Apart from the above conditions, other conditions I feel uncomfortable interpreting troponin are (if any):

My institution uses:

- high-sensitivity troponin T (in ng/mL)
 high-sensitivity troponin I (in ng/mL)
 4th-generation troponin T (in ng/L)
 4th-generation troponin I (in ng/L)
 I am unsure which type of troponin we use

Please fill out the second page at the end of the session.

After reviewing the troponin interpretation tool and educational portal:

	Strongly Disagree	Disagree	Neither Disagree Nor Agree	Agree	Strongly Agree
I learned something new	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I find this resource useful	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I will refer to this resource in my clinical practice	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I will recommend this resource to my colleague(s)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

What state do you practice in? _____

What is your clinical role?

- Attending Fellow NP PA
 Pharmacist Other _____

What is your specialty?

- Cardiology - General Cardiology - Interventional Cardiology – Heart Failure Cardiology - EP
 Cardiology - Imaging Cardiology – Cardio-Oncology Cardiology – Cardio-Obstetrics Other _____

Date: _____

What is your email address (optional)? _____
