

Welcome! Please fill out the first page at the start of the didactic session.

I am able to provide definitions to distinguish the following terms (includes obsolete terms)

	Completely Confident	Fairly Confident	Somewhat Confident	Slightly Confident	Not Confident At All
"myocardial injury" vs "myocardial ischemia" vs "myocardial infarction"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"type 2 myocardial infarction" vs "type 2 NSTEMI"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"type 4 myocardial infarction" vs "type 5 myocardial infarction"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"4th generation troponin" vs "5th generation troponin"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"troponin T" vs "troponin I"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"high-sensitivity troponin" vs "fourth-generation troponin"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

I feel comfortable with the following scenarios:

	Very Comfortable	Comfortable	Neutral	Uncomfortable	Very Uncomfortable
Discharging a patient with an elevated troponin without consultant input	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Ordering tests for a patient with an elevated troponin without consultant input	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

My comfort in interpreting troponin in patients with the following conditions is:

	Very Comfortable	Comfortable	Neutral	Uncomfortable	Very Uncomfortable
Troponin in acute coronary syndrome	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in impaired kidney function	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in sepsis	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in infection	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in physical trauma	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in atrial fibrillation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in heart failure exacerbation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in post-heart transplant	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in chemotherapy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in immunotherapy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in pregnancy (e.g. pre-eclampsia)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Apart from the above conditions, I would also benefit from guidance in interpreting troponin the following scenarios: _____

My institution uses:

- high-sensitivity troponin T (in ng/mL)
 high-sensitivity troponin I (in ng/mL)
 4th-generation troponin T (in ng/L)
 4th-generation troponin I (in ng/L)
 I am unsure which type of troponin we use

Please fill out the second page at the end of the didactic session. Include your email if you would like to enter the raffle for a \$25 gift card.

After reviewing the troponin educational material, I am able to provide definitions to distinguish the following terms (includes obsolete terms)

	Completely Confident	Fairly Confident	Somewhat Confident	Slightly Confident	Not Confident At All
"myocardial injury" vs "myocardial ischemia" vs "myocardial infarction"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"type 2 myocardial infarction" vs "type 2 NSTEMI"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"type 4 myocardial infarction" vs "type 5 myocardial infarction"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"4th generation troponin" vs "5th generation troponin"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"troponin T" vs "troponin I"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
"high-sensitivity troponin" vs "fourth-generation troponin"	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

After reviewing the troponin educational material, my comfort in interpreting troponin in patients with the following conditions is:

	Very Comfortable	Comfortable	Neutral	Uncomfortable	Very Uncomfortable
Troponin in acute coronary syndrome	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in impaired kidney function	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in sepsis	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in infection	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in physical trauma	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in atrial fibrillation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in heart failure exacerbation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in post-heart transplant	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in chemotherapy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in immunotherapy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Troponin in pregnancy (e.g. pre-eclampsia)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

I learned something new from the troponin educational material:

- Strongly Disagree
 Disagree
 Neither Disagree Nor Agree
 Agree
 Strongly Agree

What is your clinical role?

- Attending
 Fellow
 Resident
 NP
 PA
 Pharmacist
 Medical Student
 NP/PA Student
 Pharm. Student
 Other _____

What is your specialty? _____

What is your email address? _____

Date: _____
